15 Short answer — Why did the baby sparrows leave the nest?

.....

Brainy Bonus — Did you know?

House sparrows **build their nests** using twigs, grass, leaves, and even feathers to make them soft and warm — just like in our story! Both the mother AND father sparrow help to build it. Baby sparrows learn to fly about 15 days after hatching.

Now you try: Look outside for a bird's nest today. What do you think it is made of?
